

Operations

A Ship's Nerve Center

CDR V. DAWKINS

Operations . . . where everything is plotted. Vital statistics from all sections of the ship merge here. Communications . . . sends out and receives dispatches. The gang on the signal bridge raises and lowers signals. Air Intelligence compiles the vital information necessary for strikes throughout the Mediterranean. The Radar men hover over the radar scopes, as bluejackets in CIC plot it all . . . forming the nerve center of the Steel Lady.

CDR THOMAS ROBINSON
