LETTER FROM THE EDITOR

Due to an apparent administrative mistake, or computer logic failure, or to a stroke of good luck at CHINFO, (Washington), last year's Cruise Book took first prize in the all-Nav competition in the Small Command category. Encouraged by this unexpected success, and of false promises of winning an all expense paid trip to Tierra del Feugo, we have reassembled.

In once again undertaking a full scale production, the new staff hopes to demonstrate their superlative talents as photographers, editors, cartoonists and managers. In 1925 the then president Calvin Coolidge aptly remarked, "The business of America is business", and so it is that

the business of our formal committee will be "getting down to business", as can be clearly seen above.

Although unique in its outlook on life, (cenobitical to the last man), this staff is like most staffs found on today's destroyers; long on questions and short on answers. We too have learned the waltz and tango. And in spite of the everpresent lack of funds and film, what has been achieved on the following pages embodies the spirit of not only the staff, but of the entire CARON crew. We hope to have hit the mark, but this book's success shall not be truly measured by CHINFO, but by you.

C.R. Kronauer
